

Do research

Prioritised research questions

The IPCRG identified 145 primary care respiratory research needs in five domains: asthma, allergic rhinitis, chronic obstructive pulmonary disease, tobacco dependence, respiratory infections. We have subsequently prioritised these using an international e-Delphi exercise.

The IPCRG Research Sub Committee & the IPCRG Expert Research Faculty

The **Research Sub-committee** brings together a group of International Primary Care Respiratory Group members who are practising GPs and academics who are dedicated to reviewing and conducting primary care respiratory initiatives.

Research Sub Committee

Do you want support from the IPCRG research subcommittee? Please follow [this link](#) for more information

[Link to the Restricted Research Subcommittee Environment \(only members\)](#)

The **Expert Research Faculty** consists of international scientific experts who can be consulted for scientific support.

Expert Research Faculty

Are you a Research Expert? And do you want to support other researchers? Please follow [this link](#) for more information and for the Expert Faculty application form
